

**B**etween now and 2006 more nuclear decommissioning and cleanup work will be performed at Rocky Flats than anywhere else in the world.

## ROCKY FLATS SUBCONTRACTING OPPORTUNITIES

The Rocky Flats Environmental Technology site is a Department of Energy owned, former nuclear weapons facility that produced plutonium pits for nearly 40 years. Nuclear weapons production at Rocky Flats left behind a legacy of radioactive waste and environmental contamination. With no future weapons production mission, the goal is to clean up and close the site forever.

Kaiser-Hill expects to procure up to \$1.4 billion in subcontracts services and commodities over the remaining life of the Rocky Flats Closure Project, providing numerous opportunities for subcontractors. Subcontracts feature best-in-class safety and environmental performance criteria, increased subcontractor risk, and substantial competition among subcontractors.

Companies wishing to learn more about future subcontracting opportunities with Kaiser-Hill should monitor the Federal Business Opportunities System or contact David Trujillo, Small Business liaison officer, (303) 966-3526.
